stated size to allow for inside mounting.*

OUR MOST COST-EFFICIENT WINDOW TREATMENT SOLUTION.

The attractive 1" Vinyl Mini Blind sets the standard for simplicity and functionality. Just like the leaves of the lotus flower, the easy to clean vinyl material naturally repels dust, water and grime.

A new headrail design increases both durability and aesthetics, making valances a thing of the past. Both installation and operation are a breeze on this most budget-friendly cordless mini blind.

Aluminum Blinds

Unmatched Versatility and Performance

SWFcontract aluminum horizontal blinds provide an attractive, long-lasting, and highly effective way to control daylight. Aluminum horizontal blinds are available in a wide range of colors and styles to complement your project and enhance design intent.

This classic window treatment is ideal for commercial use that requires key features such as fire resistance, GREENGUARD Gold certification, and lower energy costs. When you specify aluminum horizontal blinds, specify SWFcontract.

Great for a variety
of applications

Multi-Family
Healthcare
Education

All aluminum horizontal blinds are backed by a Limited Lifetime Warranty* ensuring years of dependable operation.

SWFcontract is part of the commercial division of Springs Window Fashions, an industry leader in window coverings since 1939. SWFcontract has unmatched experience with our window coverings installed in more than one million commercial applications throughout North America.

*Apartment Mini blinds carry a one-year warranty

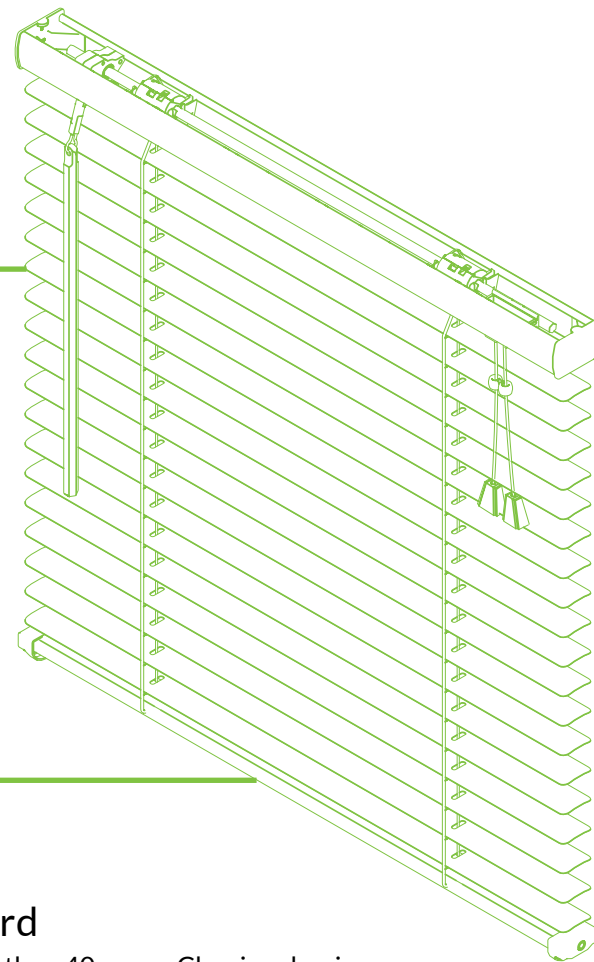

SWFCONTRACT™

Blind Systems

Precision Engineering and Durability

Our top of the line commercial-grade horizontal blind system is ideal wherever maximum solar control is needed. The S3000 blind system incorporates an integrated light-blocking lip in the headrail, hidden brackets for improved aesthetics, and a low-profile design making it as attractive as it is functional in hospitality, healthcare, corporate, and educational applications. When installed with optional hidden hole slats, the S3000 functions with similar room-darkening capabilities as blackout fabric.

S3000

Features

Light Blocking Headrail Lip

Engages top slat to eliminate light leakage at the headrail. (Available on S3000 and S4000 only)

Specialty Slats

Inverted Slats deflect daylight upward and away from occupants.

Perforated Slats allow natural light to enter a room while slats are closed.

Disengaging Clutch

Allows for effortless raising and lowering of blinds.

Anti-static Performance

Repels dust to maintain a clean, professional appearance.

Hidden Holes

Route holes are moved to the rear of the slat to provide near blackout conditions and maximum privacy when closed.

Cordless Operation

Raise and lower blinds with fingertip control eliminating the need for cords. (Available on S3000 only)

Crash-Proof Cordlock

Immediately stops blinds from lowering if cord is suddenly released.

Cut-outs

Available to custom fit a blind around obstructions or built-in architectural features.

Not all features available on all systems. See full included features on next page →

The Industry Standard

An industry standard for more than 40 years, Classics aluminum horizontal blinds feature a 1 ½" wide headrail designed for deeper mullions typically found in older buildings, aluminum frame curtain walls, and heavier commercial applications. Classics Aluminum horizontal blinds can also be tailored to fit around unique shapes and installed in angled or skylight applications.

Classics

GreenGuard Gold Certified Aluminum horizontal blinds with low chemical emissions and are acceptable for use in schools, healthcare facilities, or other locations with people who have sensitive or compromised respiratory systems.

Customizer

Featuring the same durability and design as the Classics line, but with a smaller, 1" headrail. The thinner headrail makes Customizer aluminum horizontal blinds ideal in newer buildings that use a narrower window frame.

S4000

The S4000 micro-blind is a perfect complement to the S3000 featuring ½" slats for decorative or narrow window applications.

Full-line of Horizontal Blinds Available

Faux Wood

Provides the rich, natural look of wood with the added safety of NFPA 701 fire rating.

Wood

Ideal for historic preservation projects. Wood blinds are made from North American hardwood.

Vinyl

The ideal solution for projects where tighter budgets are a consideration, while still enhancing design intent and providing long-lasting performance.
